

Co-packing & Manufacturing

Outsource your time-consuming and expensive food manufacturing and distribution.

Through our co-packing division, we help multi-unit restaurants and food-service operators scale food offerings and create consistency by managing the manufacturing and distribution of top products. Whether for a sauce, spice mix, soup, dressing, or other product, high or low volume production, Global Food Services is your answer. We create food items with accuracy and consistency every time.

Once we manufacture food items, we also manage the delivery to get the goods to your location. We use our robust distribution channels to deliver the food right to your restaurants.

- **Cost Efficiency:** Save on overhead, labor, and capital investment costs by letting Global Food Services do the buying, receiving, production and packaging.
- **Consistency:** A sauce, spice mix, or soup that is easy for one chef to make may be difficult to replicate by cooks in each location. One source for production ensures consistency.
- **Quality:** Our quality assurance starts with safe food handling and storage, quality ingredients, and proper packaging. We adhere to GMP guidelines in our FL Dept. of Agriculture licensed facility.
- **Confidentiality:** We place the highest value on the confidentiality of each proprietary recipe. Our first step is to sign a confidentiality and non-disclosure.

We serve you, so you can get back to serving your customers. Contact us today to find out how we can help you simplify your food production and distribution.
