

# Custom Recipe Development

Create new menu items for your restaurant. Work with us to develop new flavors or recreate your existing favorites.

Through our custom recipe development program, we help restaurants and franchises create a defined recipe that can be produced at scale. Whether we are starting from scratch or using an existing food item and reverse-engineering the ingredients, we can create a quality product that matches your specifications and tastes.

Our proven process is fast, efficient, and protective over your proprietary recipes.

1. We sign a confidentiality and non-disclosure agreement.
2. You provide (i) product samples; (ii) recipes and ingredient brand preferences; and (iii) packaging requirements.
3. We do a cost analysis and provide pricing back to the customer or distributor.
4. Once you determine pricing is in line with your requirements, Global Food Services will produce and have samples delivered.
5. We work with you to tweak the recipe until we get it perfect!

From Japanese, Mexican, and Southern cooking to sauces, gravy, and spice mixing, we'll help you bring your custom recipes to life. Contact us today to get started.
